

Bright Polished Hot Rolled Plate

PPS are pleased to offer their Bright Polished finish on Hot Rolled Plate up to 12mm thick.

With an extensive pre-grinding operation to remove surface scale and defects, followed by a production route that minimises the pre-grinding grain, this finish has a high degree of reflectivity.

Measuring over 600 gloss units the depth and clarity of the finish is similar to that produced on thin gauge 2B material.

This finish is very popular within the Marine Environment as well as being in demand for Architectural applications.

With a surface roughness average of less than 0.1 microns it is suitable for nearly all high-end fabrications.

For more information, and to request your free sample of this finish, contact us on 0121 555 6569 or email the Team.
