

I'm dreaming of a Bright Christmas...

Did you know that on bright annealed material we can produce a Bright/Mirror or UltraBright Finish in just a few working days? We ensure our prices are competitive and our lead-times as short as 3-4 working days (or even sooner). We try to be as flexible as possible on meeting your requirements.

Our Bright Polishing on Hot Rolled Plate has generated a lot of interest and we have had some excellent feedback from customers already. If you would like a sample of this finish please contact [Adam](#) who will be happy to arrange this for you. Available on plate from 2000 x 1000 up to 3000 x 1500, in thickness's up to 12mm (or 15mm depending on the size and weight of the plate) we have developed a finish where despite extensive pre-grinding to remove the majority of surface defects, this initial stage has been drastically minimised for the final finish. As the pre-grinding is produced via a through feed line, there is no visible banding which in turn ensures the uniformity and clarity of this finish is superb.

For more information please don't hesitate to get in touch with the Commercial Team on +44(0)121 555 6569 or email us:
